

Tarmond Lito

LITHIUM GREASES

Product Description:

Tarmond Lito is a multipurpose lithium soap grease formulated with high-quality base oils and performance additives. It is developed for the lubrication of bearings operating under medium loads and medium to high speeds, and can be safely used in wheel bearings, electric motor bearings, and centralized lubrication systems. It is suitable for automotive and industrial applications where extreme loads and very high temperatures are not present. The grease provides stable lubrication performance in humid environments, offering resistance to wear and fatigue. It delivers effective protection against rust and corrosion, extending bearing life and contributing to reduced maintenance requirements and lower operating costs.

Technical Data:

Tarmond Lito	Test Method					
NLGI	-	00	0	1	2	3
