

TARMOND MEA 710

COOLANTS & CUTTING FLUIDS

Product Description:

MEA 710 is a general purpose, multi-functional semi-synthetic emulsifiable cutting fluid with 12% oil content. Recommended for ferrous, non-ferrous and cast iron grinding and machining operation. Recommended levels between 3,0-8,0 % of usage depends on the operation performed . Ability to make stable emulsions with water between 5-20 dH hardness. Very high emulsion stability, low foaming tendency, excellent detergency, very good cooling and lubrication property, very good corrosion protection and high resistance against fungi and bacteria are the benefits of using MEA 710.

Technical Data:

TARMOND	Test method	
Color	Visual	Clear/Light Brown
Density at 15°C gr/cm ³	ASTM D 1298	1
pH %3 emulsion	DIN 51369	9.2-9.6
Refractometer factor %3 emulsion	TRM-110	1.40
Corrosion %3 emulsion	DIN 51360/2	0/0 pass
Flash point °C	ASTM D 92	240

*Above values are the typical values of the products and may vary with each batch.
