

TARMOND MEA 909

COOLANTS & CUTTING FLUIDS

Product Description:

Tarmond MEA 909 is a general purpose, bio-degradable, fully-synthetic cutting fluid. Recommended for ferrous, non-ferrous, steel and cast iron machining operation and specially recommended for tube welding industries. Recommended levels between 3,0-5,0 % of usage depends on the operation performed . Ability to make stable emulsions with water between 5-20 dH hardness. Very high emulsion stability, low foaming tendency, excellent detergency, very good cooling and lubrication property, very good corrosion protection and high resistance against fungi and bacteria are the benefits of using MEA 909.

Technical Data:

TARMOND	Test method	
Color	Visual	Clear/Light Brown
Density at 15°C gr/cm ³	ASTM D 1298	1.02
pH %3 emulsion	DIN 51369	9.3-9.5
Refractometer factor %3 emulsion	TRM-110	1.67
Corrosion %3 emulsion	DIN 51360/2	0/0 pass
Flash point °C	ASTM D 92	240

*Above values are the typical values of the products and may vary with each batch.
